

Coding Critters

WHAT'S IN THE KIT

- 7 Coding Critter kits — critter plus playset materials

QUICK-START GUIDE

1. Pick a critter and its storybook challenge.
2. Students press the directional buttons to plan the path.
3. Press play and watch the critter go.
4. Use the playset pieces to build new challenges.

GRADES K-2

Critter Rescue Stories

page 2

PRO TIP: The included storybooks make great small-group station guides.

Coding Critters

LESSON · GRADES K-2

Critter Rescue Stories

LEARNING OUTCOMES

- Students will program a sequence of moves to reach a goal
- Students will retell a sequence using ordinal words (first, next, last)
- Students will connect coding steps to story events

MATERIALS

- Coding Critter kits (1 per station group)
- Storybook challenges (included)
- Playset pieces for obstacles
- Story sequence cards (first/next/last)

INSTRUCTIONS

1. Read one critter storybook challenge aloud and solve it together.
2. Groups invent a short rescue story for their critter ('get the puppy to its bone past the slide').
3. Plan the path with pointing and counting before touching buttons.
4. Program and run; adjust until the story's ending comes true.
5. Each group retells their story with first/next/then/last while the critter re-runs it.
6. Rotate critters so every group tries a different character.

ACTIVITY

Critter Rescue Stories — students invent the story, program the journey, and retell the sequence in order words. Coding and narrative retelling reinforce each other perfectly at this age.
