

Oculus Quest 2 Kits

WHAT'S IN THE KIT

- 4 Oculus Quest 2 headsets
- Controllers
- Charging cables

QUICK-START GUIDE

1. Charge headsets fully before class.
2. Set a Guardian boundary in a clear space for each headset.
3. Use as a rotation station — 4 headsets means small groups.
4. Preview any app/experience yourself first.
5. Sanitize face pads between users.

FULL LESSONS IN THIS GUIDE

GRADES 6-8	VR Field Trip + Travel Log	page 2
GRADES 9-12	Career Immersion Day	page 3

PRO TIP: Motion comfort varies — always offer an opt-out role like 'navigator' or 'note-taker.'

Oculus Quest 2 Kits

LESSON · GRADES 6-8

VR Field Trip + Travel Log

LEARNING OUTCOMES

- Students will gather sensory details from an immersive environment
- Students will write descriptive text using concrete observed details
- Students will compare mediated experience to secondhand research

MATERIALS

- Oculus Quest 2 headsets (4 stations)
- Pre-vetted VR experience (ocean, space, or historical site)
- Travel journal template
- Sanitizing wipes; non-VR station roles (navigator, note-taker)

INSTRUCTIONS

1. Preview the full experience yourself; set each headset to the same app.
2. Brief norms: seated or guardian-bounded, 5-7 minutes per turn, opt-out roles available.
3. Rotation: while 4 students explore, others draft setting questions or research the destination.
4. Immediately after each turn, students braindump sensory notes — sights, sounds, scale, feelings.
5. Writing block: transform notes into a vivid travel journal entry.
6. Share pairs read entries aloud; listeners identify the most transporting sentence.

ACTIVITY

VR Field Trip + Travel Log — visit the destination, then write it. The sensory braindump-to-journal pipeline reliably produces the most vivid writing of the term.

Oculus Quest 2 Kits

LESSON · GRADES 9-12

Career Immersion Day

LEARNING OUTCOMES

- Students will explore a career domain through simulation
- Students will research education pathways, salaries, and outlooks for a career
- Students will synthesize experience and research into a career evaluation

MATERIALS

- Oculus Quest 2 headsets with job-simulation/training experiences
- Career research template (pathway, cost, salary, outlook)
- Devices for research (O*NET, BLS, college sites)

INSTRUCTIONS

1. Curate 3-4 career-relevant experiences (trades, medical, design, spatial work).
2. Students pick a career track and complete the matching VR session.
3. Immediately capture: what surprised you? What skills did it actually demand?
4. Research block: pathway, required education, real salary ranges, job outlook.
5. Synthesis: one-page 'would I pursue this?' evaluation citing both the sim and the data.
6. Optional counselor debrief circle on findings.

ACTIVITY

Career Immersion Day — try the job in VR, then investigate what it takes in reality. The gap between 'that was fun' and 'here's the pathway' is where the real counseling conversation starts.
