

Qball Throwable Microphone

WHAT'S IN THE KIT

- 3 Qballs (throwable mic in foam ball)
- 1 receiver per Qball

QUICK-START GUIDE

1. Plug the receiver into your speaker/sound system.
2. Power on the Qball — you're live.
3. Toss it to the speaker; the foam protects the mic (and heads).
4. Works for discussions, assemblies, recordings, and game shows.

FULL LESSONS IN THIS GUIDE

GRADES K-2	Toss-and-Tell Circle	page 2
GRADES 3-5	Classroom Game Show	page 3
GRADES 6-8	Socratic Seminar Amplified	page 4
GRADES 9-12	Town Hall Debate	page 5

PRO TIP: Also brilliant for recording student voice for podcasts when paired with the Podcasting Kit.

Qball Throwable Microphone

LESSON · GRADES K-2

Toss-and-Tell Circle

LEARNING OUTCOMES

- Students will practice turn-taking in group discussion
- Students will speak audibly to a whole group
- Students will listen actively and build on others' ideas

MATERIALS

- Qball + receiver + classroom speaker
- Circle seating
- Discussion prompt (story question, sharing topic)

INSTRUCTIONS

1. Establish the ritual: only the ball-holder talks; everyone else listens.
2. Practice one silly round: catch, say your favorite animal, toss on.
3. Real round: pose the prompt and let the ball travel.
4. Coach tosses to include quiet voices without spotlighting them.
5. Add the build-on move: 'I agree with ____ because...' before new ideas.
6. Close by asking: was it easier to listen when you knew the ball might come?

ACTIVITY

Toss-and-Tell Circle — the mic IS the talking piece: catch it, share, toss it on. Quiet voices get literally amplified, and interrupting becomes physically impossible.

Qball Throwable Microphone

LESSON · GRADES 3-5

Classroom Game Show

LEARNING OUTCOMES

- Students will recall and apply content knowledge under light pressure
- Students will formulate answers aloud in complete sentences
- Students will participate in structured competitive review

MATERIALS

- Qball + speaker
- Review question bank from a current unit
- Team scoreboard
- Game-show timer sounds (optional but magical)

INSTRUCTIONS

1. Split into teams; explain the rule: you must catch the Qball to answer.
2. Host reads a question; toss the ball to a volunteering (or chosen) contestant.
3. Full-sentence answers earn a bonus point — sneaky oral language practice.
4. Missed questions bounce (literally) to the other team.
5. Rotate a student host role halfway through.
6. Close with team lightning round: ball travels down the line, one answer each.

ACTIVITY

Classroom Game Show — content review where you catch the mic to answer. Engagement doubles when the microphone flies, and the student-host rotation builds emcee confidence.

Qball Throwable Microphone

LESSON · GRADES 6-8

Socratic Seminar Amplified

LEARNING OUTCOMES

- Students will engage in evidence-based academic discussion
- Students will yield and take the floor with formal discussion norms
- Students will self-assess contribution quality from a recording

MATERIALS

- Qball + speaker (recording setup optional)
- Seminar text read in advance
- Discussion norm cards (build, challenge, clarify, evidence)
- Contribution self-assessment sheet

INSTRUCTIONS

1. Circle up with the text annotated; review the seminar norms.
2. The Qball marks the floor: hold it to speak, pass it to yield.
3. Open with an interpretive question; let the ball manage the flow.
4. Track moves: students flash norm cards showing what kind of move they're making.
5. Optional: record audio through the receiver for later review.
6. Self-assessment: students score their best contribution and set a next-time goal.

ACTIVITY

Socratic Seminar Amplified — the thrown mic paces the seminar, marks the speaker, and slows interruptions. Recording through the receiver makes contribution self-assessment concrete.

Qball Throwable Microphone

LESSON · GRADES 9-12

Town Hall Debate

LEARNING OUTCOMES

- Students will deliver persuasive remarks in a formal setting
- Students will respond extemporaneously to opposing arguments
- Students will manage speaking dynamics with real audio

MATERIALS

- Qball + PA/speaker setup
- Debate resolution prepared in advance
- Floor-speech format: opening statements, floor rounds, closing
- Timekeeper and moderator role cards

INSTRUCTIONS

1. Set the town-hall format: prepared openings, then moderated floor rounds.
2. Floor rule: raise a hand, receive the thrown mic, speak within time.
3. Student moderator recognizes speakers and manages the throw order.
4. Coach mic technique live: distance, projection, pacing with amplification.
5. Closing statements synthesize the floor debate, not just the prepared notes.
6. Debrief both content and stagecraft: what changed when your voice filled the room?

ACTIVITY

Town Hall Debate — formal floor debate where speakers receive the flying mic and hear their own amplified voice. Public-speaking practice with real audio dynamics and real adrenaline.
